Size of the area will depend upon unit height and width. In most cases, they will fit inside a gym, church or school. Grass or concrete is just fine!

Yes. Call us for pricing. Many parks require some sort of insurance certificate which we can take care of. Anything we can do to make your experience enjoyable, just ask.

What kind of power is required?

The Moonwalk site must be within 75 feet of a dedicated 20 amp circuit. The blower uses as much electricity as an indoor fan once the bouncer is fully inflated. If you are having more than one inflatable please consult us on power and outlets.

Do you deliver and set up the Moonwalks?

Yes. We deliver and set up all inflatable units and insure that they are clean before your party starts. We also insure that the units are in good working condition, as we test the units for safety after setup.

Are Moonwalks safe?

Absolutely! As long as all the rules outlined on the operating procedures page of your rental contract are followed, and the unit is supervised at all times, they are very safe.
